DETAILED ACTION

Specification

1. The specification is objected to for not having antecedent basis for the means plus function terms used in claim 8.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "criterion" which appears to refer to the aggregation process. In claim 5 the criterion is "in said information of said at least one publisher". It is not clear who owns the "criterion".

Claim 8 recites means plus function language but does not use these terms in the specification. It is not clear what the scope of these terms are.

Art Unit: 3627

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-13, as best understood by the examiner, are rejected under 35 U.S.C. 102(e) as being anticipated by Walker et al.

Walker et al. shows, figures 13A-14B, a system and method for aggregating multiple buyers. Step 1304 subscribes to a topic. Step 1318 shows aggregating. Step 1344 places a group order in response to the aggregation. Step 1410 seller sent (published) response (information). Time and price are part of the aggregation. The process is available for generic goods/services, this includes bulk goods. Central controller automatically monitors everything. The group CPO may or may not fulfill the suppliers desired amount to sell.
